

Instructions for use - Please read carefully!

Majola® - H5-Creme

Protection of sensitive skin

COMPOSITION

Aqua, Glyceryl Stearate, Glycerin, Isopropyl Palmitate, Decyl Oleate, Alcohol Denat., Octyldodecanol, Ceteareth-12, Cetyl Alcohol, Parfum, Sorbic Acid, Potassium Hydroxide, Tocopheryl Acetate.

PROPERTIES

- **Majola® H5 Creme** is a biologically acidic emulsion containing fatty alcohols and natural oils in easily absorbable form.
- When used regularly **Majola® -H5 Creme** eliminates the irritations of the skin due to swelling, degreasing and dryness of the skin caused by the frequent use of soaps, synthetic washing substances, detergents, disinfectants, washing up liquids and washing powders and restores rapidly the skin milieu modified by washings by restoring the biological acid coating of the skin.
- **Majola® -H5 Creme** protects the skin when working with water and strengthens the natural skin bacterial flora protecting the skin and helps crowding out non-resident germs.
- **Majola® -H5 Creme** is resorbed by the skin very quickly so that the hands leave no greasy film on the objects touched.
- **Majola® -H5 Creme** protects the skin when wearing gloves.

RANGE OF APPLICATION

- For the protection of the skin when carrying wet tasks, especially in case of dry and chapped skin.
- For skin protection of the hands of surgeons, surgical staff, nurses and nursing staff.
- Skin care during and after treatment of eczema or allergic skin irritations.
- To support prevention of professional dermatitis (The Trade Cooperative Association of Employers, Germany, prescribes that suitable skin care products must be made available to affected workers [see German Regulations (BGW-Instructions BGR 250 / TRBA 250 article 4.1.1.1)].

MODE OF APPLICATION

Apply a thin layer of **Majola® -H5 Creme** after washing or bathing and rub in well. The product does not leave any greasy film on the skin.
