

Instructions for use - Please read carefully!

## Wasa®- Reinigungsschaum (Foam)

**Skin cleansing and care foam - contains no aerosols.  
Prevents B.O.**

### Composition

**Ingredients:** Aqua, Alcohol Denat., Sodium Laureth Sulfate, PEG-7 Glyceryl Cocoate, Urea, Disodium Laureth Sulfosuccinate, Dibutyl Adipate, Disodium Cocoamphodiacetate, Sorbic Acid, Farnesol, Fragrance

### Properties

- **Wasa®- Reinigungsschaum** is a foam with a slightly acidic pH which cleans the skin thoroughly. For this reason it is appropriate for use on all skin types, and helps prevent eczema, infectious skin diseases and bedsores to a large extent.
- Maintains the natural acid protection of the skin independently of its type.
- Nourishes and protects the skin through re-fattening and re-moisturizing substances
- Deodorises and prevents B.O.
- Mild cleaning action, even without using water
- Can be used at all times and everywhere, without water or extra dispensing device
- Friendly to the environment for the following reasons:
  - contains no aerosols
  - all components are biodegradable
  - parsimonious use of cleaning substances
  - packagings are made of easily disposable materials

### Range of application

- Cleaning of soiled skin areas (e.g., in case of incontinence, anus praeter etc.); also appropriate for the normal cleaning of hands and skin
- For use on soap-sensitive, irritated, chapped skin
- Care of sick/bedridden people, the invalids; helps to prevent decubitus (bedsores)
- Baby and child care

### Mode of application

Apply **Wasa®- Reinigungsschaum** directly on the skin areas to be cleaned, or use a cloth to apply the product on the skin. After a short exposure time, the foam dissolves the dirt. Wipe clean with a soft – dry or wet – one-way cloth and then dry.

**Wasa®- Reinigungsschaum** can also be used with water like any other cleansing lotion. If necessary, a non-fatty cream (for example **Majola®-H5-Creme**) can be applied on the cleaned area.

### Standard packaging / transport units:

18 x 200 ml bottle with foam nozzle  
2 x 5 l canister
